

Manifesto of Neo Post-Object Art

The art of the future will
exist only in the mind.

All artworks that have a physical form, no matter how contemporary, are now objects of nostalgia. Likewise artworks wrapped in the aura of technology, stored or displayed on technologically advanced devices, have already become objects of nostalgia.

In order to embrace Neo Post-Object Art, an artist must abandon the physical construction of artworks thereby working entirely intellectually.

The Neo Post-Object artist must adhere to the following principles:

- 1.** The Neo Post-Object artist works entirely intellectually and is not concerned with the physical production of an artwork.
- 2.** The artist produces only the instructions for an artwork.
- 3.** The instructions are not to be used for the making of a physical object or visual representation of the artwork.
- 4.** To avoid being classified as the artwork, the instructions should have no linguistic or graphic ornamentation.
- 5.** The instructions may be of any length but must be communicated in as plain and precise a form as possible.
- 6.** The instructions should exist and be reproduced only in order to convey the artwork.
